

**We claim:**

1. The use of an enzyme mixture containing at least one enzyme with phospholipid:diacylglycerol acyltransferase activity for the production of plant storage lipids containing polyunsaturated fatty acids.  
5
2. The use as claimed in claim 1, wherein an enzyme mixture containing at least one enzyme with phospholipid:diacylglycerol acyltransferase activity and at least one further enzyme with the activity of a hydroxylase, epoxygenase, acetylenase, desaturase, elongase, conjugase, trans-desaturase or isomerase is employed.  
10  
15
3. The use as claimed in claim 1 or 2, wherein an enzyme mixture containing an enzyme with phospholipid:diacylglycerol acyltransferase activity, desaturase and elongase activity is employed.  
20
4. The use as claimed in any of claims 1-3 for the production of long-chain polyunsaturated fatty acids.  
25
5. The use according to any of claims 1-4 for the production of gamma-linolenic acid, arachidonic acid, gamma-limolenic acid, eicosapentaenoic acid, stearidonic acid or docosahexaenoic acid.  
30
6. The use as claimed in any of claims 1-5, wherein the enzyme with PDAT activity is encoded by a nucleotide sequence which is capable of replication, is present in a plant cell in at least 2 copies and/or contains regulatory sequences bringing about an at least 2-fold  
35

increase in gene expression and/or enzyme activity.

- 5        7. The use as claimed in any of claims 1 to 3,  
         wherein the replicating nucleotide sequence  
         encoding an enzyme with PDAT activity is encoded  
         chromosomally or extrachromosomally.
- 10      8. The use as claimed in any of claims 1 to 4,  
         wherein the nucleotide sequence encoding an enzyme  
         with PDAT activity is derived from plants.
- 15      9. The use as claimed in any of claims 1 to 5,  
         wherein the nucleotide sequence encoding an enzyme  
         with PDAT activity is derived from *Arabidopsis*  
         *thaliana*.
- 20      10. The use as claimed in any of claims 1 to 6,  
         wherein the enzyme with PDAT activity encompasses  
         an amino acid sequence as shown in SEQ ID No. 2  
         encoded by a nucleotide sequence as shown in SEQ  
         ID No. 1 or alleles thereof.
